Only those products bearing the UL Recognized Component Mark should be considered as being  
covered by UL's Recognition and Follow-Up Service.

The UL Recognized Component Mark generally consists of the manufacturer's identification and  
catalog number, model number or other product designation as specified under "Marking" for the  
particular Recognition as published in the appropriate UL Directory. As a supplementary means of  
identifying products that have been produced under UL's Component Recognition Program, UL's  
Recognized Component Mark: , may be used in conjunction with the required Recognized Marks.  
The Recognized Component Mark is required when specified in the UL Directory preceding the  
recognitions or under "Markings" for the individual recognitions.

Recognized components are incomplete in certain constructional features or restricted in  
performance capabilities and are intended for use as components of complete equipment submitted  
for investigation rather than for direct separate installation in the field. The final acceptance of the  
component is dependent upon its installation and use in complete equipment submitted to UL LLC.

Look for the UL Recognized Component Mark on the product.
